

Hands free

If you own a Tablet Computer... You've Got to Have *IT*!

The *IT* Case gives the executive, student or specialist on-the-go the opportunity for total mobility with their tablet computers.

In the *IT* Case, the tablet computer balances perfectly from a single shoulder strap for hands free computing. When convenient, the tablet can be dropped to the hip. Close the *IT* Case and the shoulder strap wraps around and is secured against the *IT* Case for a sharp notebook look under the arm or to pack away in a backpack or briefcase. The *IT* Case is designed for optimal light weight functionality, rugged construction and flow through ventilation

Features:

- Every *IT* Case is designed for a specific tablet computer model
- Unique mid-line suspension design provides for single shoulder strap easy writing mode
- The close fitting design provides additional protection in a backpack or briefcase
- Thick polyethylene hard board insert and ventilated back panel
- Totally synthetic construction to tolerate weather extremes
- The top cover wraps around to attach to the back panel
- Total ventilation design to allow air intake and exhaust
- Feet on the back panel assure continued ventilation.
- Durable PVC Coated black polyester outer covering
